Partners in Prevention Mentoring Program,  
established in 1996, envisions a community in which  
every youth experiences nurturing, one-to-one  
relationships and community support.  
Through these relationships, mentors inspire young  
men and women for success in area school districts  
including: Hallsville, Kilgore, Longview,  
Pine Tree, and Spring Hill.  
Over 200 children are served yearly.

Young People with mentors: Are less likely to begin  
using illegal drugs/alcohol, Have fewer depressive  
symptoms, Have better grades in school, Have a  
better chance of going on to a higher education!
